## ***StrongBlock Buffer-I***

**Assay diluent for reducing nonspecific binding, cross-reactivities and matrix effects in immunoassays**

Catalog No      SBA-001-0250  
Lot No            B109242578  
PH                7.2 ± 0.2  
Storage          2-8°C  
Expiration        After receiving, 12 months for unopened and 6 months for opened

### **Fields of application**

ELISA, IHC, Western Blot and Protein Array.

### **Instructions for use**

- *StrongBlock buffer I* reduces low-affinity bindings and offers a smooth reduction of non-specific signal. Thus it fits the immunoassay that capture and detection reagents have moderate binding affinity to analyte ( $K_d > 10^{-7}$  M). In the assay, the specific signal is not depressed.
- When the capture and detection reagents have high binding affinity to analyte ( $K_d < 10^{-10}$  M), *Next Generation buffer II, III* are recommended.

### **Quality Control**

Quality System Department      Date: 09-Mar-2020

**Laboratory reagent for in vitro research use. Not for use in diagnostic procedures.**
