

LowBinding Buffer-V

Assay diluent for reducing nonspecific binding, cross-reactivities and matrix effects in immunoassays

Catalog No	LBA-005-0500
Lot No	L118753517
PH	7.2 ± 0.2
Storage	2-8°C
Expiration	After receiving, 12 months for unopened and 6 months for opened

Fields of application

ELISA, IHC, Western Blot and Protein Array.

Instructions for use

- *LowBinding buffer V* reduces low-affinity bindings and offers a smooth reduction of non-specific signal. Thus it fits the immunoassay that capture and detection reagents have moderate binding affinity to analyte ($K_d > 10^{-7}$ M). In the assay, the specific signal is not depressed.
- When the capture and detection reagents have high binding affinity to analyte ($K_d < 10^{-10}$ M), *LowBinding buffer II, III and IV* are recommended.

Quality Control

Quality System Department Date: 16-Sep-2022

Laboratory reagent for in vitro research use. Not for use in diagnostic procedures.
